

S Walton Blvd. and Walmart Entrance Intersection

The existing intersection of Walton Boulevard and Walmart Entrance already operates at an overall intersection LOS F. It ranks in the top 10 for both existing delay and queues, with queues extending beyond 2,000 feet. It is recommended that dual left-turn lanes be added on the eastbound and westbound approaches for vehicles turning onto Walton Boulevard. The added capacity is expected to improve traffic operations and safety at the intersection.
